c)
$$C$$
 is a suitary matrix.
• $det(c^{+}) = det(c)^{+}$.
Since $C^{+}C = 1$, is $det(c^{+}C) = det(c^{+}) det(c)$

$$= |det(c)|^{2} = 1$$

$$\Rightarrow det(c) = e^{i\Delta t} \text{ for some real } x.$$

Results that $det(\overline{\Phi}(y_{0})) = det(c) det(\overline{\Phi}(y_{0}))$, we have
$$det(\overline{\Phi}(y_{0})) = e^{i\Delta t} det(\overline{\Phi}(y_{0}))$$
